

Dear reader,

The BioGrace-II GHG calculation tool is being updated. A draft of the updated version will soon be published. If you wish to be informed on BioGrace developments then please register to a news message service per e-mail. News messages will appear infrequently: once a year up to a few times a year. You can register via [this web page](#).

You receive this e-mail as you registered to a former newsletter of the BioGrace-I and BioGrace-II projects in the period 2010 - 2015. The subscription list of this old newsletter is used one more time to send this mail. The list will then be emptied. **So you need to take action if you want to receive further news messages on the BioGrace GHG calculation tools.**

With kind regards,

John Neeft
